DEPARTMENT OF AGRICULTURE
HELENA, MONTANA

December 27, 1968

The Honorable Tim Babcock
Governor of the State of Montana
Helena, Montana

Dear Governor Babcock:

In conformance to Section 3-106 R.C.M. 1947 I am pleased to transmit herewith fiscal information regarding the activities of the Montana Department of Agriculture for the fiscal year ending June 30, 1968. The fiscal figures indicate the regulatory and marketing activities of the various divisions. The pertinent figures for each division are included and I submit them for your scrutiny. I am pleased to say all of the divisions were able to properly furnish necessary service to people in the industry and have operated well within their budgeted funds.

The report has been delayed in order that we might furnish more accurate figures on the value of production for 1968 crops. They are as follows:

VALUE OF PRODUCTION IN THOUSAND DOLLARS

	<u>1966</u>	<u>1967</u>	<u>1968*</u>
Wheat	\$148,781	\$160,869	\$145,329
Hay	85,722	86,940	77,078
Barley	55,301	31,839	32,051
Sugar Beets	13,568	14,400	15,029
Potatoes	4,080	3,910	4,957
All other crops	<u>8,867</u>	<u>7,550</u>	<u>7,562</u>
TOTAL - All Main Crops	\$316,319	\$305,514	\$282,006

* 1968 Figures are preliminary estimates.

Wheat production in Montana totaled a record of over 125,809,000 bushels, up some 6% from last year's 119.1 million. Of this total, winter wheat totaled 86.7 million bushels, 3% more than 1967. Spring wheat produced 31.5 million bushels 4% above 1967, the balance being made up of 7.7 million bushels of durum. The 42.7 million bushels of barley was 15% larger than 1967 but 19% below average. The sugar beet crop at 1,051,000 tons was the second highest on record. Hay crop totaled some 3.6 million

The Honorable Tim Babcock
December 27, 1968
Page 2

tons, down some 1/3 million tons from 1967. Sweet cherry crop at 1,500 tons, was only about 1/2 the previous year's crop. I am pleased to say that livestock and livestock products continued to play a most important part in our agricultural production and livestock marketings were up substantially this year. The large hay crop and above normal range conditions indicate good production for another year.

The following figures on cash marketing on crops and livestock are indicative of the great impact of agricultural income on the state's economy. Preliminary figures on cash marketings are as follows:

	<u>CASH FARM RECEIPTS IN MILLION DOLLARS</u>	
	<u>1967</u>	<u>1968</u>
Livestock & Livestock Products	267.2	280.0
Crops	220.8	190.0
Government payments (Conservation, Sugar Act, Wool Act, Soil Bank, & Wheat and Feed Grains, etc.)	<u>69.1</u>	<u>75.0</u>
	557.1	545.0

These figures indicate the supreme importance of agriculture in the Montana economy.

The drop in crop income reflects a weakening in the price structure for some of the major crops, especially wheat, the states leading crop. Total returns from crops were approximately some fifteen million dollars down even though production was at an all time high.

Livestock and livestock products showed a substantial increase and along with increased government payments, kept the farm income from slipping further.

Respectfully submitted,

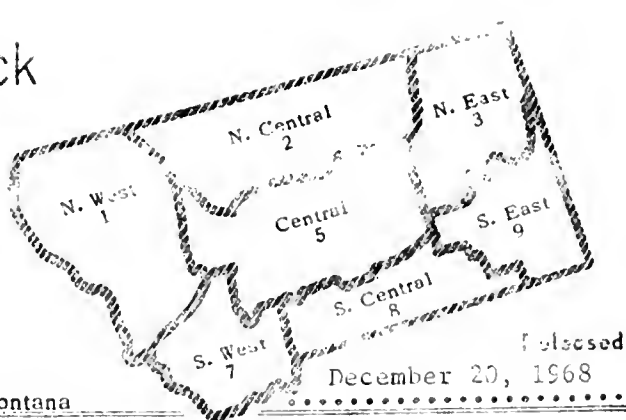

C. Lowell Purdy
Commissioner of Agriculture

MONTANA CROP PRODUCTION—1968

1968 FAVORABLE CROP YEAR Good yields of all major crops, except seeds, were harvested by Montana producers in 1968. Although northwestern and northeastern counties were dry, mother nature provided average or above rainfall to all other parts of the State. Temperatures were about 2 degrees below normal during the growing season. Near the end of the winter wheat harvest, cool weather and frequent showers delayed harvest of remaining crops. Lodging and shattering occurred, and late harvesting was delayed nearly two weeks. Irrigation water was adequate, and less than average hail losses were reported. Total acreage of all major crops was 8,209,500 or 5 percent less than a year ago.

EXCEPTIONAL WHEAT CROP Record high all wheat production was 125,869,000 bushels, 6 percent more than previous record produced in 1967. A total of 4,550,000 acres of wheat were harvested in 1968, down 184,000 from 1967. Winter wheat came through the winter in good condition, but light wind damage in the north central counties required some replanting to spring wheat.

WINTER WHEAT Yield, at 31.5 bushels per acre, was the largest ever attained in Montana. Production climbed to 86,656,000 bushels, 3 percent above the 1967 output. Spring wheat (other than durum) production at 31,548,000 bushels was 4 percent higher than last year but 12 percent below average. The durum crop at 7,665,000 bushels was 68 percent above last year's crop and 79 percent above average.

OUTSTANDING BARLEY YIELD This year's barley yield of 37 bushels per acre was second highest, exceeded only by 38.5 bushels in 1965 and 1966. Production was 42,735,000, up 15 percent from a year ago.

The oat crop was 7,280,000 bushels, 41 percent larger than the 1967 crop but 18 percent below the 1962-66 average. Flaxseed output was 66,000 bushels, up sharply from a year ago but third smallest on record.

IRRIGATED CROP YIELDS GOOD Adequate irrigation water and late killing frost made up for the slow start of irrigated crops. Sugarbeet production was 1,051,000 tons, second highest on record. The yield of 16.0 tons per acre was down from last year but 7 percent above the 5-year average.

The dry bean crop, at 162,000 bags (clean basis) was 12 percent above last year but 25 percent below average. The 1,458,000 cwt. of potatoes produced this year is 4 percent below last year but 10 percent above average.

SEED CROP YIELD DWINDLES Alfalfa seed production is 2,015,000 pounds, 34 percent below last year's crop and 56 percent less than average. The smallest red clover seed crop on record in Montana, 126,000 pounds, was harvested in 1968. This was 10 percent below last year and was a plunge of 57 percent from average.

AVERAGE HAY CROP Although below last year's record, this year's 3,585,000 tons of hay was 2 percent greater than average.

SWEET CHERRY CROP AVERAGE The 1968 sweet cherry crop of 1,500 tons, down sharply from last year's bumper crop, was 6 percent above average.

1/ All estimates for 1968 are preliminary. 2/ Planted acreage of corn for all purposes. 3/ Average prices beginning with 1964 crop reflect open market sales and do not include the value of marketing certificates or payments-in-kind received by growers. 4/ Price & value excludes Government payments. 5/ Prices per cwt. 6/ Price of baled hay. 7/ Production in actual tons. 8/ Includes some quantities not harvested on account of economic abandonment in Montana in 1966 and 1967 and for U.S. in 1966, 1967 and 1968.

"Effective January 1, 1969, the Statistical Reporting Service plans to discontinue calculation and publication of 5-year averages that appear in this report. The report will contain data for the current and the two preceding years. It is believed that changes in agriculture have decreased the value of the 5-year averages for making comparisons."

WORK PERFORMED

Period: July 1, 1967 - June 30, 1968

COMMERCIAL FEED & FERTILIZER

Commercial Feeds Registered	1,607
Commercial Feeds Gross Annual Value Number Firms	355
Commercial Feed Samples brought in	607
Analysis run on these samples	4,358
Commercial Fertilizer number of firms	78
Commercial Fertilizer registered grades	406
Additional grades	19
Tonnage	163,638
Blending Plants	22
Soil Amendments	4
Fertilizer samples brought in	360
Analysis run on these samples	851

July 1, 1967 through June 30, 1968

FIELD WORK DAIRY DIVISION

1.	Total Licenses issued	1,395
2.	Eggs, Dairy products, Oleomargarine Poultry and store inspections	876
3.	Sanitary inspection of plants manufacturing dairy products	682
4.	Quality tests on dairy products	1,435
5.	Dozens of eggs checked for proper grade	361,940
6.	Number of egg seals sold	9,100,000
7.	Butterfat tests for dairy products	988
8.	Milk and cream butterfat tests run to check accuracy of payments to producers	1,223
9.	Trips on pickup bulk milk tanks to check accuracy of sampling and weighing milk from farm tanks	46
10.	Pounds of poultry inspected and cheese graded for USDA (poultry, cheese and turkeys)	506,305
11.	Cold Seal Farm Inspection	99
12.	Examination Babcock & Egg Graders License	11
13.	Wholesale Egg and Butter Inspections	19
14.	Official or Miscellaneous calls	2,081
15.	Chick Dealers Inspection	2
16.	Weights checked dairy products - Butter, Cottage Cheese, Oleomargarine	27,991
	Ice Cream	10,912
17.	Novelties checked	21,663
18.	Milk Farm Inspections	7
